PROFESSIONAL SUMMARY

- Have 6.5 years of experience as SAP ABAP Developer with decent knowledge on SD, FI, MM & QM Modules.
- Involved in Support, Integration and Rollout Projects.
- Areas of expertise include Adobe Forms and Reports. Also worked on Workflow, Module Pool Programming, IDoc, Function Modules, BADI, BAPI, BTE, User-Exits, Enhancements, BDC, Smartforms and SAP Scripts.
- Have excellent Analytical and Problem-solving skills. Proficient in debugging standard transactions and workflows.
- Extremely good at Performance Tuning and Optimizing the code.
- Effectively used Service-Now for Incidents & Project Management.
- Involved in Requirement gathering, Analysis, Design, Development, Testing and Documentation of customized applications.

SKILLS

SAP ABAP   SAP Workflow   Concur   JAVA   Android App Development   HTML   Bootstrap   Python

WORK EXPERIENCE

Consultant
Deloitte Consulting India Pvt. Ltd.

02/2018 – Present   *Hyderabad*

Client: Dairy Farmers of America (Leading National Milk Marketing co-operative in USA)

Achievements/Tasks

- Developed a Workflow to notify the person responsible for the Task of a QM Notification, upon release of the Task. Also, handled event "ResponsibleIsChanged" to notify both old and new persons responsible. And to complete the Workflow after the Task is marked as "Completed" or "Deleted".
- Developed a Utility Report that notifies the Developers whenever their Transports get released to further landscapes (Quality/Production), which reduces manual efforts to check the Transport Logs every single day.
- Worked on a Finance Project which involved calling an External API provided by a bank to validate the Master Data changes and gets sent through the Vendor Workflow, where the Approvers can take action based on the response from API.
- Created an RF compatible program to reverse the Goods Receipt of Pack Order and its linked Bulk Orders based on Sequence No.
- Developed a program to generate the Annual Mailer Letters by displaying content from the Standard Text with dynamic values and formatting the style of the text using Smart Styles while displaying on Adobe forms. This allowed the business users to change the content every year directly in the Standard Text, without the need of making any changes in the Program or Adobe form every year.
- Provided a solution to reduce those manual efforts and automated the update of Profit Center prior to processing the payments, before which Finance Team used to execute a custom transaction daily and check for errors on Profit Center to re-process them by updating the Profit Center manually. This saved lot of manual efforts for Finance Team.
- Created a Dashboard in Service-Now that shows the Statistics and Active Tickets for the Entire Team, which is used by Managers to keep track of the Team's work.
- Had setup On-call Scheduling in Service-Now to automate the process of preparing Roster and sending Reminder emails to the Primary and Secondary Contact Resources every week, which used to be done manually earlier.

Contact: **Yaseen Mohamad – +91 8951847615**

Software Engineer

Tech Mahindra

08/2014 – 01/2018   *Hyderabad, Bangalore & Chennai*

Client: Solenis (Leading Global Chemical Manufacturing Company)

Achievements/Tasks

- IDocs gets generated with Payment Run with the Payment Method "Cheque". Developed a report to get the IDoc details and generate Data and Control files (Needed to Out-source the checks) that gets stored in the application server, which will be sent to the Bank via WebMethods.
- Implemented notes to generate Hungarian Audit Report and have done some customization to the Invoice details in that report using User-Exits as per customer's requirement.
- A Custom Report exists to post Accounting Documents by pulling the expense reports from the Extract file generated in Concur (Third-Party Expense Management Application) via WebMethods. Enhanced this report to post documents for Credit Card & Purchase Card Expenses along with Out-Of-Pocket Expenses including VAT details handling Taxation based on region.
- Acted as Concur Administrator and provided support for Customers for issues with payments and new user setup.
- Developed a Custom Program to get the Payroll file (from WorkDay HR system) pushed into the application server and post the Journal entries to get the payment done. Also, added the functionality to send the error documents as Fallouts, and to trigger an email regarding this error, which helps the authorized person to fix the errors in the document and re-process it.
